ABOUT ME_

Scientist/Engineer interested in the perceived quality of real-time visual experiences. More specifically, I work on understanding, quantifying and maximizing perceptual realism, accurate reproduction, and quality (with constituents such as spatial quality, dynamic range, depth, motion and color) for real-time image/video capture (computational photography), synthesis (rendering/graphics) and display (computational display).

The long term goals I aim to push towards are:

- A comprehensive understanding of how the human visual system understands visual realism and aesthetic quality.
- Real-time immersive displays (VR/AR) that are perceptually indistinguishable from the real-world.
- Real-time camera ISPs that can not only allow us to capture the world exactly as our eyes are see it, but also subjectively understand and optimize perceived aesthetic attributes associated with the captured scenes.

Research and Development of real-time computational photography/videography algorithms to maximize visual quality for capture and display.

RESEARCH SCIENTIST INTERN - VISION SCIENCE AND DISPLAY ALGORITHMS

10/2022 - 6/2023 Sunnyvale, California, USA

Meta [⋀]

Mentors: Alex Chapiro*, Ajit Ninan, Nathan Matsuda, Douglas Lanman

Worked with the Applied Perception Science and Display Systems Research teams on perceptually optimized computational display algorithms for real-time VR. Designed an ultra-fast automatic/adaptive tone mapper (that optimally maintains perceptual appearance of HDR content after mapping) for standalone VR displays.

DOCTORAL RESEARCHER - VISION SCIENCE AND AR/VR GRAPHICS

Perception, Display and Fabrication Group - USI

Mentor: Piotr Didyk

Under the mentorship of Piotr Didyk, I worked towards realizing the dream of real-time AR/VR that is perceptually indistinguishable from the visual world. After carefully understanding and investigating the many intricacies of human vision, I designed real-time rendering algorithms to preserve the perception of spatial realism, dynamic range, motion, and depth/distance in AR/VR.

GRADUATE RESEARCHER - IMAGE/VIDEO QUALITY AND ENHANCEMENT

2017 - 2019

2020 - 2024

Lugano, Switzerland

Daejeon, South Korea

Video and Image Computing Lab - KAIST

Mentor: Munchurl Kim

Worked on teaching neural networks to perceive image/video quality the same way humans do, with a specific focus on maximizing perceptual quality for Video Restoration/Enhancement.

UNDERGRADUATE RESEARCHER

2016 - 2017

Islamabad, Pakistan

Neuro-informatics Research Group - NUST SEECS

Mentor: Awais Kamboh

Designed real-time unsupervised signal processing algorithms, and their corresponding digital architectures (using VHDL and FPGAs) for future implantable neural chips (primarily

for neuro-prosthetics)
